

Limnor Tutorial

Limnor is the world's first generic purpose no-coding programming system. It can be used to create computer software without using any computer languages. This tutorial teaches you the basic skills of using Limnor.

This tutorial is not intended to introduce you to all the rich features and capabilities of Limnor. It only uses a few examples to teach you the basic concepts involved in using Limnor to do programming. The important thing is to apply these concepts to your programming practice so that you can use the many other features provided by Limnor.

Table of Contents

Basic skills

[Lesson 1. Hello World](#)

[Lesson 2. Use Performers](#)

[Lesson 3. Use Performers without user interface](#)

[Lesson 4. Create new pages](#)

[Lesson 5. Use action list](#)

[Lesson 6. Assign actions at runtime](#)

[Lesson 7. Multi-language application](#)

[Lesson 8. Distribution of your applications](#)

[8.1. Full release](#)

[8.2. Delta release](#)

Advanced topics

[Lesson 9. Use databases](#)

[9.1. Create a new database](#)

[9.2. Build table relations](#)

[9.3. Use data on a page](#)

[9.4. Make data updateable](#)

[9.5. Use data from more than one table](#)

[9.6. Use combined fields and user defined field names](#)

[9.7. Link data to Performers](#)

[9.8. Hide DataTable](#)

[9.9. Data input screen design](#)

[9.10. Link to pictures](#)

[9.11. Use filters](#)

[9.12. Search database](#)

[9.13. Distribution and deployment – Client/Server](#)

[9.14. Distribution and deployment – Desktop](#)

[9.15. Design your own data viewing format](#)

[9.16. Use pivot table \(cross-tab table\)](#)

[9.17. Merge data into Word documents](#)

- [9.17.1. Merge data by value-search](#)
- [9.17.2. Merge data by field name](#)
- [9.17.3. Copy data to tables](#)
- [9.18. Data transfer](#)
 - [9.18.1. Direct data transfer](#)
 - [9.18.2. Remote data transfer](#)
 - [9.18.3. Data transfer for only newer data](#)
- [9.19. Other topics](#)

[Lesson 10. Kiosk applications](#)

- [10.1. Make a kiosk application](#)
- [10.2. Automatic monitoring remote kiosks](#)
- [10.3. Exit password](#)
- [10.4. User activity logging and statistics](#)
- [10.5. Smart card](#)
- [10.6. Coin validate](#)
- [10.7. Phone dialer](#)
- [10.8. Send emails](#)
- [10.9. User questionnaire](#)
- [10.10. Automatic remote updating](#)
- [10.11. On screen keyboard](#)

[Lesson 11. Use Math expression](#)

[Lesson 12. Use variables \(runtime data\)](#)

[Lesson 13. Enable/Disable actions at runtime](#)

[Lesson 14. Project management](#)

[Lesson 15. Create menus](#)

[Lesson 16. Use timers](#)

[Lesson 17. Programming drag and drop](#)
