

Most Basic Steps in Using MySQL

1. Download and install MySQL server

Download URL: <http://www.mysql.com/downloads/mysql/>

Install MySQL server on your computer

2. Run MySQL console

Suppose we installed MySQL server on the Windows computer.

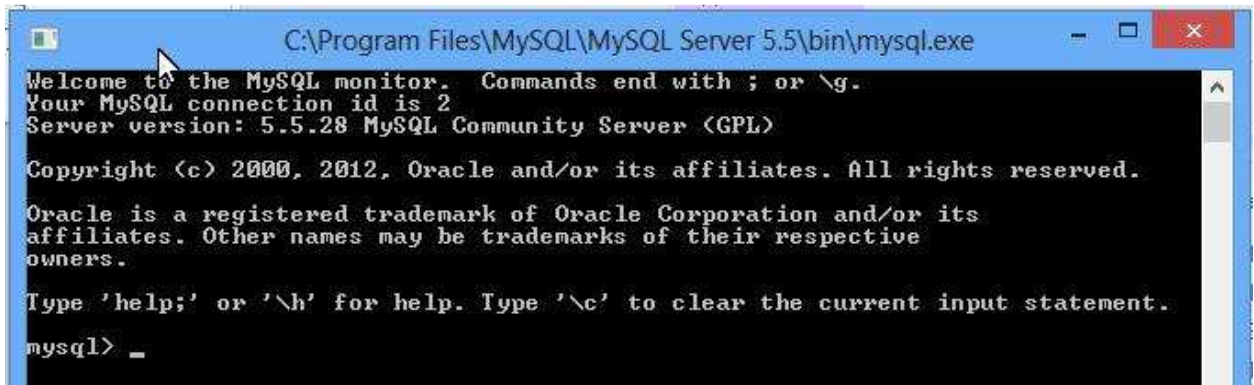

MySQL console is a program named mysql.exe. You may find it under the bin folder of your MySQL installation folder. For example,

C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe

You may also run it with user name and password. Suppose user name is root and password is 123 then the command line can be:

```
"C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe" -uroot -p123
```

A sample console screenshot is shown below:

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.5.28 MySQL Community Server (GPL)

Copyright (c) 2000, 2012, Oracle and/or its affiliates. All rights reserved.

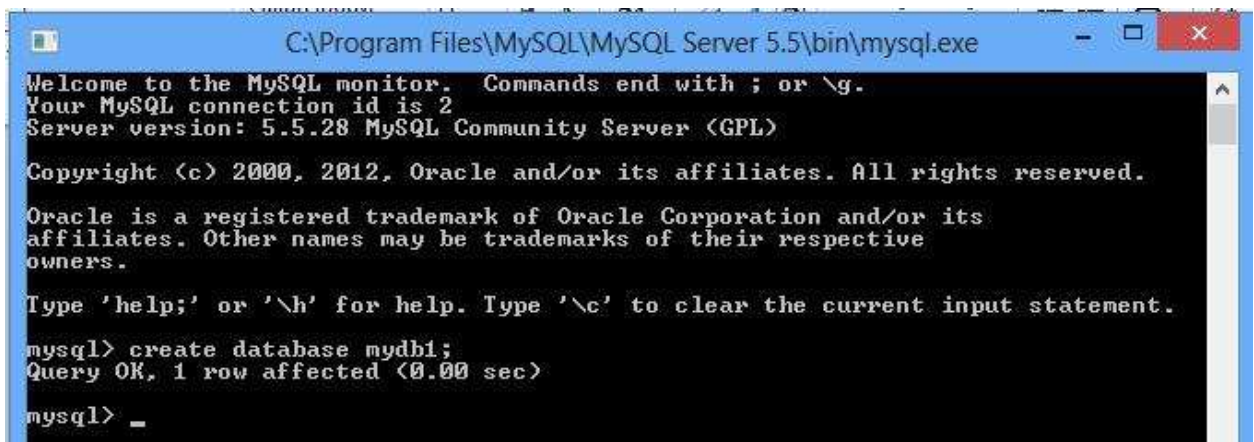

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
mysql> _
```

3. Create a new database

The command is: create database {database name};

For example, create database mydb1;

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.5.28 MySQL Community Server (GPL)

Copyright (c) 2000, 2012, Oracle and/or its affiliates. All rights reserved.

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

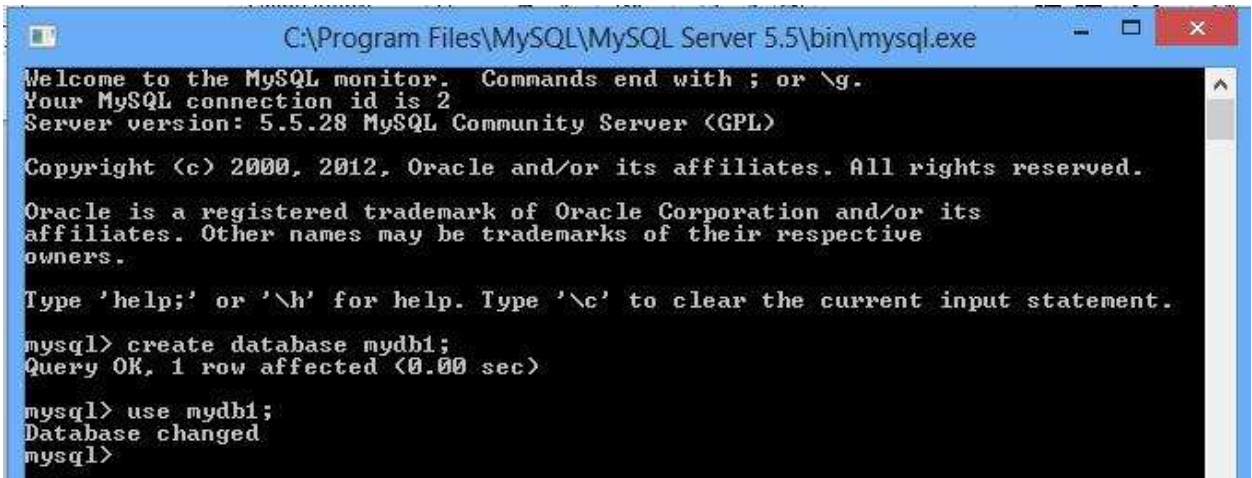

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
mysql> create database mydb1;
Query OK, 1 row affected (0.00 sec)

mysql> _
```

4. Switch to database

The command is: use {database name};

For example, use mydb1;

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.5.28 MySQL Community Server (GPL)

Copyright (c) 2000, 2012, Oracle and/or its affiliates. All rights reserved.

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

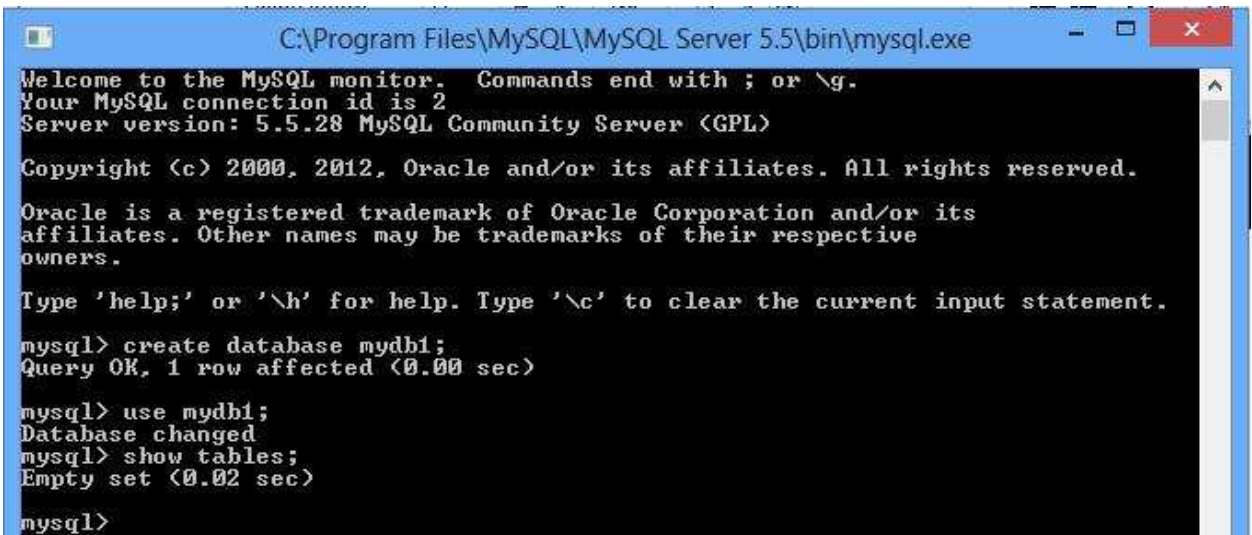

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

mysql> create database mydb1;
Query OK, 1 row affected (0.00 sec)

mysql> use mydb1;
Database changed
mysql>
```

5. Show all tables

The command is: show tables;

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.5.28 MySQL Community Server (GPL)

Copyright (c) 2000, 2012, Oracle and/or its affiliates. All rights reserved.

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

mysql> create database mydb1;
Query OK, 1 row affected (0.00 sec)

mysql> use mydb1;
Database changed
mysql> show tables;
Empty set (0.02 sec)

mysql>
```

It shows empty because we just create this database.

6. Create new tables

Let's copy into the console the following SQL script for creating a table:

```
CREATE TABLE testtable (
    TestID INT NOT NULL AUTO_INCREMENT,
    Field1 CHAR(60) NOT NULL,
    Field2 INT NULL,
    Field3 DATETIME NULL,
    Field4 DECIMAL(10,2) NULL,
    Field5 TEXT NULL,
    PRIMARY KEY (TestID)
);
```

Press {Enter} key if the console stops at the ";" symbol. The console will execute the script and report the result, as shown below:

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.5.28 MySQL Community Server (GPL)

Copyright (c) 2000, 2012, Oracle and/or its affiliates. All rights reserved.

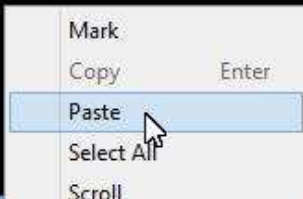

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

mysql> create database mydb1;
Query OK, 1 row affected (0.00 sec)

mysql> use mydb1;
Database changed
mysql> show tables;
Empty set (0.02 sec)

mysql>
```

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
affiliates. Other names may be trademarks of their respective
owners.

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

mysql> create database mydb1;
Query OK, 1 row affected (0.00 sec)

mysql> use mydb1;
Database changed
mysql> show tables;
Empty set (0.02 sec)

mysql> CREATE TABLE testtable (
->   TestID INT NOT NULL AUTO_INCREMENT,
->   Field1 CHAR(60) NOT NULL,
->   Field2 INT NULL,
->   Field3 DATETIME NULL,
->   Field4 DECIMAL(10,2) NULL,
->   Field5 TEXT NULL,
->   PRIMARY KEY (TestID)
-> );
Query OK, 0 rows affected (0.03 sec)

mysql>
```

If we run "show tables;" then we can see the new table is listed:

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
mysql> use mydb1;
Database changed
mysql> show tables;
Empty set (0.02 sec)

mysql> CREATE TABLE testtable (
->     TestID INT NOT NULL AUTO_INCREMENT,
->     Field1 CHAR(60) NOT NULL,
->     Field2 INT NULL,
->     Field3 DATETIME NULL,
->     Field4 DECIMAL(10,2) NULL,
->     Field5 TEXT NULL,
->     PRIMARY KEY (TestID)
-> );
Query OK, 0 rows affected (0.03 sec)

mysql> show tables;
+-----+
| Tables_in_mydb1 |
+-----+
| testtable       |
+-----+
1 row in set (0.00 sec)

mysql>
```

7. Show columns

The command is: show columns from {table name};

For example, show columns from testtable;

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
-> );
Query OK, 0 rows affected (0.03 sec)

mysql> show tables;
+-----+
| Tables_in_mydb1 |
+-----+
| testtable       |
+-----+
1 row in set (0.00 sec)

mysql> show columns from testtable;
+-----+-----+-----+-----+-----+-----+
| Field | Type          | Null | Key | Default | Extra          |
+-----+-----+-----+-----+-----+-----+
| TestID| int(11)       | NO   | PRI | NULL    | auto_increment|
| Field1| char(60)     | NO   |     | NULL    |                |
| Field2| int(11)      | YES  |     | NULL    |                |
| Field3| datetime     | YES  |     | NULL    |                |
| Field4| decimal(10,2)| YES  |     | NULL    |                |
| Field5| text         | YES  |     | NULL    |                |
+-----+-----+-----+-----+-----+-----+
6 rows in set (0.03 sec)

mysql>
```

8. Show data

We may run all valid SQL scripts in the console. For example, use a SELECT query to get data:

```
C:\Program Files\MySQL\MySQL Server 5.5\bin\mysql.exe
mysql> show tables;
+-----+
| Tables_in_mydb1 |
+-----+
| testtable       |
+-----+
1 row in set (0.00 sec)

mysql> show columns from testtable;
+-----+-----+-----+-----+-----+-----+
| Field | Type          | Null | Key | Default | Extra          |
+-----+-----+-----+-----+-----+-----+
| TestID| int(11)       | NO   | PRI | NULL    | auto_increment|
| Field1| char(60)     | NO   |     | NULL    |                |
| Field2| int(11)       | YES  |     | NULL    |                |
| Field3| datetime     | YES  |     | NULL    |                |
| Field4| decimal(10,2)| YES  |     | NULL    |                |
| Field5| text         | YES  |     | NULL    |                |
+-----+-----+-----+-----+-----+-----+
6 rows in set (0.03 sec)

mysql> select * from testtable;
Empty set (0.00 sec)

mysql>
```
